

Screenshots of Project Working-

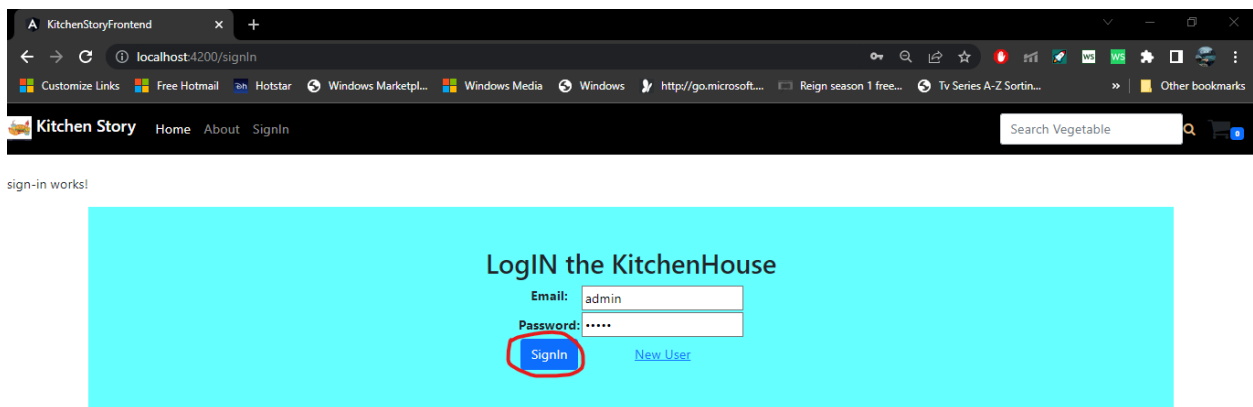

On running the **KitchenStory.java** in the **Eclipse** and after that run the angular project **KitchenStory** in angular by running the command **ng serve -o** in command prompt.

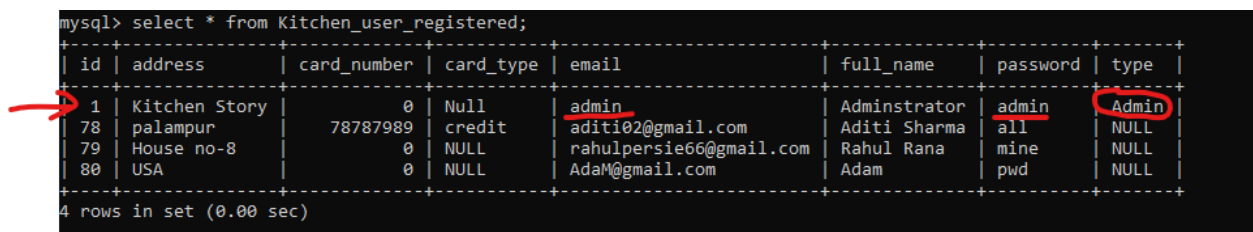

```
PS F:\VsCode\19May\KitchenStory-e-commerce\KitchenStoryFrontend> ng serve -o
✓ Browser application bundle generation complete.
```

Initial Chunk Files	Names	Raw Size
vendor.js	vendor	2.36 MB
polyfills.js	polyfills	294.86 kB
styles.css, styles.js	styles	210.19 kB
main.js	main	197.04 kB
scripts.js	scripts	36.57 kB

Picture 1- Running the command **ng serve -o** to open application in the browser

Picture 2- In browser display of KitchenStoryFrontend (Sign-In option of Frontend)

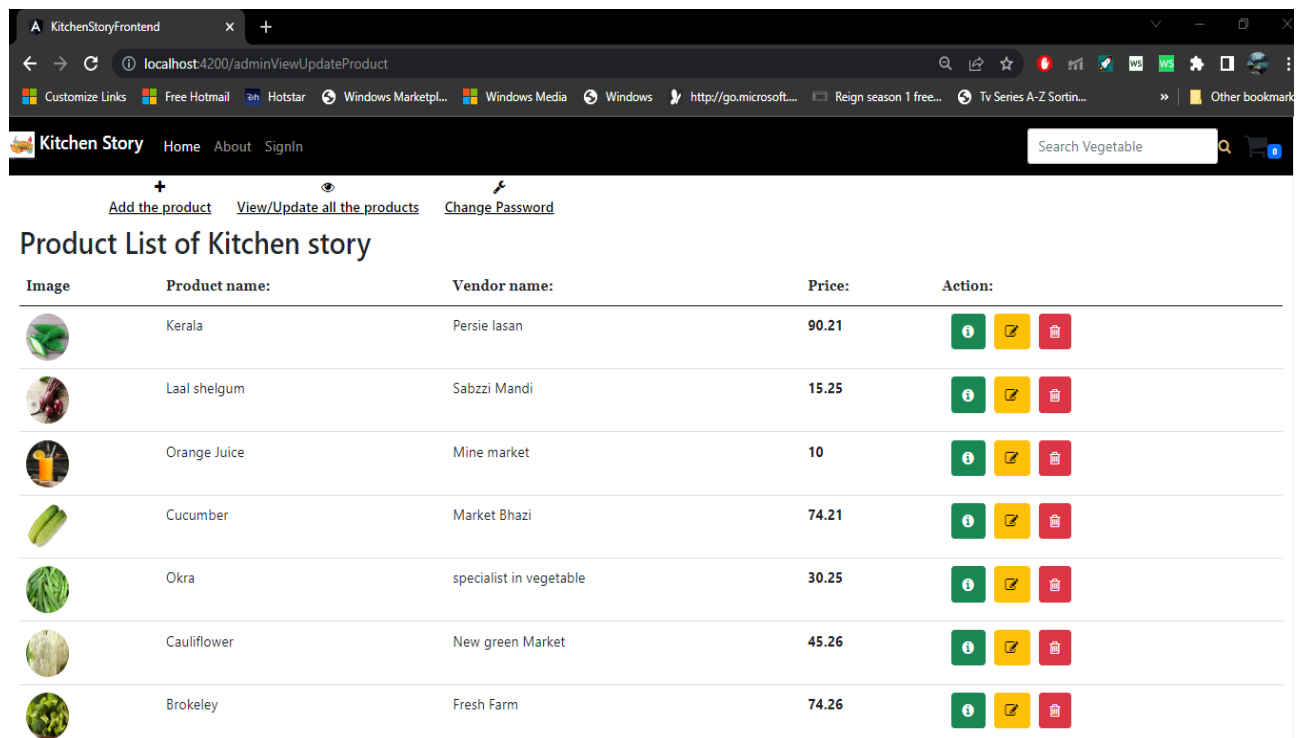

```
mysql> select * from Kitchen_user_registered;
```

id	address	card_number	card_type	email	full_name	password	type
1	Kitchen Story	0	Null	admin	Adminstrator	admin	Admin
78	palampur	78787989	credit	aditi02@gmail.com	Aditi Sharma	all	NULL

Picture 4- Kitchen_product before adding to the database : fun

When we select the **add the product** option in the website, then it will show interface like this. And after adding the details of the product in the form.

KitchenStoryFrontend

localhost:4200/addProduct

Kitchen Story Home About SignIn Search Vegetable

add-product works!

Product Name:
Litchi

Vendor Name:
Fresh Farm

Price (₹):
145.26

Details:
Fruits are totally grows via organic farming

Type:
fruit

Image Url:
../assets/Litchijpg

Add Product Back

Picture 5-Add the product option in the Kitchen Story Website

Now it will be added to **table:Kitchen_product** that is shown in below picture.

```
mysql> select * from kitchen_product;
```

prod_id	img_url	price	prod_detail	prod_name	vendor_name	type
78	../assets/kerala.jpg	90.21	kerala the green vegetable	Kerala	Persie lasan	veg
